

# About us

We are an Austrian private enterprise that is specialized in the recycling of ferrous and non-ferrous scrap, waste management, and logistics. Additionally, industrial dismantling works are offered as well as a metal market.

A team of about 150 employees cares with know-how and flexibility for a reliable support of the customers. Long lasting, successful partnerships with customers and suppliers stand for quality, transparency and fairness.

Sites in Ybbs, Mitterdorf and Wien-Strebersdorf guarantee an optimal local support.

Highly developed logistic solutions such as the container terminal, the own public Danube harbor, and the truck fleet stand for trendsetting and environmentally sound transport possibilities "just in time".

Nationally and internationally - Schaufler has developed into a powerful partner for the steel- and metal-processing industry.
