

# Harbor & container terminal

The importance of the Danube as a route of transport in Europe increases continually. Using its own public harbor, Schaufler takes advantage of an optimization of the transport route.

Miscellaneous harbor services are offered: Preparation of waybills, loading and unloading of ships, as well as dismantling ships.

At Schaufler you find optimal conditions for the movement of goods and for the operation of the container terminal:

- Harbour crane for general and bulk cargo
- Container forklift with a 45 ton load capacity
- Free storage area of about 60.000 m<sup>2</sup>
- Close vicinity to the highway A1
- Own rail-connection to the "Westbahn"
- Consisting infrastructure

Schaufler is your provider of multi-functional harbor service with plenty of experience in the heart of Europe.
